

WHOLE SCHOOL OVERVIEW COMPUTING

		Autumn 1	Autumn 2	Spring 1	Spring 2	Summer 1	Summer 2
Cycle A	EY	Using devices		Creating Content		Using the internet	
	Y1/2	Computing Systems and Networks Technology Around Us	Creating Media Digital Painting	Programming A Moving A Robot	Data and Information Grouping Data	Creating Media Digital Writing	Programming B Programming Animations
	Y3/4	Computing Systems and Networks Connecting Computers	Creating Media Stop-Frame Animation	Programming A Sequencing Sounds	Data and Information Branching Databases	Creating Media Desktop Publishing	Programming B Events and Actions in Programs
	Y5/6	Computing Systems and Networks Systems and Searching	Creating Media Video Production	Programming A Selection in Physical Computing	Data and Information Flat-File Databases	Creating Media Introduction to Vector Graphics	Programming B Selection in Quizzes
Cycle B	EY	Using devices		Creating Content		Using the Internet	
	Y1/2	Computing Systems and Networks IT Around Us	Creating Media Digital Photography	Programming A Robot Algorithms	Data and Information Pictograms	Creating Media Digital Music	Programming B Programming Quizzes
	Y3/4	Computing Systems and Networks The Internet	Creating Media Audio Production	Programming A Repetition in Shapes	Data and Information Data Logging	Creating Media Photo Editing	Programming B Repetition in Games
	Y5/6	Computing Systems and Networks Communication and Collaboration	Creating Media Web Page Creation	Programming A Variables in Games	Data and Information Spreadsheets	Creating Media 3D Modelling	Programming B Sensing Movement

Cycle A

	Autumn 1	Autumn 2	Spring 1	Spring 2	Summer 1	Summer 2
EY	Using devices 1. Can you play a game on the interactive whiteboard or tablet?	Using devices 1. How do you make a floor turtle move?	Creating Content 1. How do you take a photograph on a tablet?	Creating Content 1. How do you make a voice recording on a tablet?	Using the internet 1. How do you keep safe when using the internet?	Using the internet 1. How do you find the answer to a question on the internet?
Year 1/2	Computing Systems and Networks Technology Around Us 1. What technology is in your classroom? 2. What are the different parts of a computer? 3. How do you use a mouse? 4. How do you use a keyboard? 5. How do you edit text? 6. What are the rules for using technology responsibly?	Creating Media Digital Painting 1. How can we paint using computers? 2. How can we make different shapes using computers? 3. How can you create a digital painting, inspired by an artist? 4. What do different tools do? 5. Which tool is best? 6. What is it like to paint on a computer?	Programming A Moving A Robot 1. What will the command do? 2. What is direction? 3. What is the difference between a forwards and backwards movement? 4. How can the robot move? 5. What will the program do? 6. How can you fix a problem?	Data and Information Grouping Data 1. What are the objects? 2. How can we input information? 3. How would you describe the object? 4. Which objects have the same properties? 5. How can we compare the groups? 6. How are the groups similar or different?	Creating Media Digital Writing 1. How can we use a computer to write? 2. How do you add and remove text? 3. What is a toolbar? 4. What changes can you make to a text? 5. Why did you use that tool? 6. What is it like to write on a computer?	Programming B Programming Animations 1. What does your command do? 2. What makes a simple programme on Scratch Jnr? 3. Why do the blocks have numbers? 4. Why does each sprite have its own instructions? 5. What is your project design? 6. Can you use an algorithm to create a program?
Year 3/4	Computing Systems and Networks Connecting Computers 1. How do digital devices function? 2. What are input and output devices? 3. How can digital devices change the way we work? 4. How can a computer network be used to share information? 5. How can digital devices be connected? 6. What are the physical components of a network?	Creating Media Stop-Frame Animation 1. Can you explain that animation is a sequence of drawings or photographs? 2. Can you relate animated movement with a sequence of images? 3. Can you plan an animation? 4. Can you identify the need to work consistently and carefully? 5. Can you review and improve an animation? 6. Can you evaluate the impact of adding other media to an animation?	Programming A Sequencing Sounds 1. Can you explore a new programming environment? 2. Can you identify that commands have an outcome? 3. Can you explain that a program has a start? 4. Why does a sequence of commands have an order? 5. How do you change the appearance of your project? 6. Can you create a project from a task description?	Data and Information Branching Databases 1. How do you create questions with yes/no answers? 2. Can you identify the attributes needed to collect data about an object? 3. How do you create a branching database? 4. Can you explain why it is helpful for a database to be well structured? 5. How do you plan the structure of a branching database? 6. Can you independently create an identification tool?	Creating Media Desktop Publishing 1. How do text and images convey information? 2. How can text and layout be edited? 3. Can you choose appropriate page settings? 4. How do you add content to a desktop publishing publication? 5. How do different layouts suit different purposes? 6. What are the benefits of desktop publishing?	Programming B Events and Actions in Programs 1. How does a sprite move? 2. Can you create a program to move a sprite in four directions? 3. Can you adapt a program to a new context? 4. How will you develop your program by adding features? 5. Do you know how to identify and fix bugs in a program? 6. Can you design and create a maze-based challenge?
Year 5/6	Computing Systems and Networks Systems and Searching 1. How can computers be connected together to form systems? 2. What is the role of computer systems in our lives? 3. Can you experiment with search engines? 4. How do search engines select results? 5. How are search results ranked? 6. Why is the order of search results important, and to whom?	Creating Media Video Production 1. What makes a video effective? 2. What digital devices can record video? 3. Can you capture video using a range of techniques? 4. How do you create a storyboard? 5. How can video be improved through reshooting and editing? 6. What is the impact of the choices made when making and sharing a video?	Programming A Selection in Physical Computing 1. Can you control a simple circuit connected to a computer? 2. How do you write a program that includes count-controlled loops? 3. Can you explain that a loop can stop when a condition is met? 4. Can you explain that a loop can be used to repeatedly check whether a condition has been met? 5. Can you design a physical project that includes selection? 6. Can you create a program that controls a physical computing project?	Data and Information Flat-File Databases 1. Why is a form useful to record information? 2. What are the advantages and disadvantages of paper and computer-based databases? 3. How can you answer questions by grouping and then sorting data? 4. How can tools be used to select specific data? 5. How can computer programs be used to compare data visually? 6. Can you use a real-world database to answer questions?	Creating Media Introduction to Vector Graphics 1. How can drawing tools be used to produce different outcomes? 2. Can you create a vector drawing by combining shapes? 3. How will you use tools to achieve a desired effect? 4. What is a vector drawing? 5. Why does grouping objects make them easier to work with? 6. What I have learned about vector drawings?	Programming B Selection in Quizzes 1. How is selection used in computer programs? 2. What is a conditional statement? 3. How does selection direct the flow of a program? 4. Can you design a program which uses selection? 5. Can you create a program which uses selection? 6. Can you evaluate your program?

		Cycle B					
		Autumn 1	Autumn 2	Spring 1	Spring 2	Summer 1	Summer 2
EY		Using devices	Using devices	Creating Content	Creating Content	Using the internet	Using the internet
			1. Can you play a game on the interactive whiteboard or tablet?	1. How do you make a floor turtle move?	1. How do you take a photograph on a tablet?	1. How do you make a voice recording on a tablet?	1. How do you keep safe when using the internet?
Year 1/2		Computing Systems and Networks IT Around Us	Creating Media Digital Photography	Programming A Robot Algorithms	Data and Information Pictograms	Creating Media Digital Music	Programming B Programming Quizzes
		1. What is IT? 2. What is IT used for in school? 3. What is IT used for beyond school? 4. What are the benefits to using IT? 5. How is IT used safely? 6. What choices are made when using information technology?	1. What devices are used to take photographs? 2. What is landscape and portrait? 3. What makes a good photograph? 4. How does lighting effect a photograph? 5. How can a photograph/image be changed? 6. Are all images real?	1. What is your sequence? 2. What happens when we change the order of instructions? 3. What do you predict the outcome of your program will be? 4. What makes a program? 5. What does your algorithm look like? 6. How did you debug your program?	1. How can we organise information? 2. How can data be represented? 3. Can you represent data in a pictogram? 4. What is an attribute? 5. What attributes do people have? 6. How can we present data on a computer?	1. How does music make you feel? 2. What is rhythm? 3. How can you change sound on a computer? 4. How can a computer be used to create a musical pattern? 5. Can you create music for purpose? 6. What changes can you make to refine your work?	1. What does a sequence of commands need? 2. What is an outcome? 3. What will be the outcome of the algorithm? 4. How can the design be changed? 5. What does your program look like? 6. How can your project be improved?
Year 3/4		Computing Systems and Networks The Internet	Creating Media Audio Production	Programming A Repetition in Shapes	Data and Information Data Logging	Creating Media Photo Editing	Programming B Repetition in Games
		1. How do networks physically connect to other networks? 2. How do networked devices make up the internet? 3. How can websites be shared via the World Wide Web (WWW)? 4. How can content be added and accessed on the World Wide Web (WWW)? 5. How is the content of the WWW created by people? 6. What are the consequences of unreliable content?	1. How can sound can be recorded? 2. How can audio recordings be edited? 3. What are the different parts of creating a podcast project? 4. Can you apply audio editing skills independently? 5. Can you combine audio to enhance your podcast project? 6. Can you evaluate the effective use of audio?	1. Why is accuracy in programming so important? 2. Can you create a program in a text-based language? 3. What does 'repeat' mean? 4. Can you modify a count-controlled loop to produce a given outcome? 5. Can you decompose a task into small steps? 6. Can you create a program that uses count-controlled loops to produce a given outcome?	1. What can data that has been gathered over time be used for? 2. Can you use a digital device to collect data automatically? 3. What does a data logger collect? 4. How can a computer help us analyse data? 5. Can you identify the data needed to answer questions? 6. Can you use data from sensors to answer questions ?	1. How can the composition of digital images be changed? 2. How can colours be changed in digital images? 3. How can cloning be used in photo editing? 4. How can images be combined? 5. For what purpose might you combine images? 6. How can changes improve an image?	1. Can you use count-controlled loops in a different programming environment? 2. What are infinite loops and count controlled loops in programming? 3. Can you develop a design that includes two or more loops which run at the same time? 4. Can you modify an infinite loop in a given program? 5. Can you design a project that includes repetition? 6. Can you create a project that includes repetition?
Year 5/6		Computing Systems and Networks Communication and Collaboration	Creating Media Web Page Creation	Programming A Variables in Games	Data and Information Spreadsheets	Creating Media 3D Modelling	Programming B Sensing Movement
		1. What is the importance of internet addresses? 2. How is data transferred across the internet? 3. How can sharing information online help people to work together? 4. What are some of the different ways of working together online? 5. How can we communicate using technology? 6. What are the advantages and disadvantages of different methods of online communication?	1. Can you review an existing website and consider its structure? 2. What are the features of a web page? 3. When creating a web page have you considered the ownership and use of images (copyright)? 4. Have you recognised the need to preview pages? 5. Can you outline the need for a navigation path? 6. What are the implications of linking to content owned by other people?	1. What is a 'variable'? 2. Why is a variable used in a program? 3. How can you improve a game by using variables? 4. Can you design a project that builds on a given example? 5. Can you use your design to create a project? 6. Can you evaluate your project?	1. Can you create a data set in a spreadsheet? 2. Can you build a data set in a spreadsheet? 3. How can formulas be used to produce calculated data? 4. Can you apply formulas to data? 5. Can you create a spreadsheet to plan an event? 6. Can you choose suitable ways to present data?	1. How can you work in three dimensions on a computer? 2. How can digital 3D objects can be modified? 3. How can objects be combined in a 3D model? 4. Can you create a 3D model for a given purpose? 5. Can you plan your own 3D model? 6. Can you create your own digital 3D model?	1. Can you create a program to run on a controllable device? 2. How can selection control the flow of a program? 3. Can you update a variable with a user input? 4. Can you use a conditional statement to compare a variable to a value? 5. Can you design a project that uses inputs and outputs on a controllable device? 6. Can you develop a program to use inputs and outputs on a controllable device?
